

STATE OF MICHIGAN

Date of Verification: January 1, 2017

The CRS provides credits to communities for certain state laws, regulations, and standards that support floodplain management within a state and have proven effective in reducing flood damage. This Verification Report is provided to explain the recommendations of Insurance Services Office, Inc. (ISO) to DHS/FEMA concerning state-based credits under the Community Rating System (CRS) within the above state.

State-based credit is awarded to communities for activities that are implemented and enforced by the State. The credit is provided to each community in the State and documentation is not needed from the community. Other potential credit lists the CRS activities where communities may receive CRS credit based on, or due to, state or regional programs that are within the community. The potential credits must be community verified by the ISO/CRS Specialists within each community, since enforcement is done at the community (or regional) level.

The following is a summary of state-based credit and other potential credit based on the 2017 *CRS Coordinator's Manual*:

State-based Credit

Activity 340 Hazard Disclosure, Other Disclosure Requirements (ODR) –

Credit is provided for the state's requirement that sellers disclose flood damage and whether flood insurance has been purchased. (10 points)

Activity	Element	Points
