On each row of the table below, initial the box that applies to the project, signifying that the appropriate steps were taken (shaded areas are "not applicable"). Then sign at the end of the certification. More information on these programs can be found in Figure 500-5 of the Coordinator's Manual.

Federal Funding	No Federal Funding	Certification Statement for Acquisition and Relocation Projects
		All properties marked "FEMA Funded" on CC-520EHP-1 were included in the above description of the FEMA-funded project.
		State and local requirements: In addition to federal laws, implementing regulations, and executive orders, this project took into consideration the requirements of all state and local environmental and historic preservation laws, ordinances, and permits that apply to this type of project. Communication with the appropriate state agency and/or local government entity took place before project implementation. Any recommendations made by the agency or office were carried out.
		National Historic Preservation Act: If any acquired or relocated structure affected by this project was 50 years of age or older at the time of the acquisition, communication with the State Historic Preservation Officer or Tribal Historic Preservation Officer (if on tribal land or reservation) took place to determine if the structure was either on or eligible for the National Register of Historic Places (historic property) and to resolve any adverse effect(s) to the historic property.
		Protection of floodplains (E.O. 11988—Floodplain Management): Consideration was given to the project's long- and short-term adverse impacts that are associated with the occupance and modification of floodplains, and to avoiding direct and indirect support of floodplain development wherever there was a practicable alternative.
		E.O. 11990—Protection of Wetlands: Consideration was given to the possible loss or degradation of wetlands associated with the construction of this project, as well as to the preservation and enhancement of the natural and beneficial values of wetlands.
		E.O. 12898—Environmental Justice in Minority and Low-income Populations: Consideration was given to the possible negative impacts associated with the implementation of this project on minority and low-income populations, and to avoiding those impacts where practicable.

Federal Funding	Community		Sta	ate	CID
Funding Funding For projects in areas subject to the Coastal Barrier Resources Act: There was communication with the U.S. Fish and Wildlife Service regarding this project's potential to jeopardize any ecologically sensitive coastal barrier resources. Any recommendations made by the Service were carried out. For projects in coastal communities: There was communication concerning this project with the state lead coastal zone management agency regarding the enforcement of the policies of the state's coastal zor management program in carrying out federally funded or federally authorized construction activities. And recommendations made by the agency were carried out. In addition to the above, for projects that also involved the development of a new site on which to place the relocated building(s), contributing in the appropriate boxes, below. Endangered Species Act: Consideration was given to the protection and preservation of threatened and/only endangered species (including plants and animals and their habitat) whose existence may have bee threatened by the construction activities. Communication took place with the U.S. Fish and Wildlife Servic (or the National Marine Fisheries Service if the project is in a coastal area) and the applicable state agencie for state-protected species and/or their habitat. Any recommendations made by the Services or state agencies were carried out. Archaeological and Historic Preservation Act: The effects of the proposed relocation on archaeologic sites were considered. Point source and non-point source discharge (Clean Water Act, Section 402): Consideration was give to all permit requirements for municipal point source discharge (sewage treatment plant discharge) as well a non-point discharge (surface runoff) of a pollutant into surface waters. Communication with the U.S. Army Corps of Engineers took place. Any recommendations made by the Corp were carried out. Predge and fill materials (Clean Water Act, Section 404): Consideration was given to all permit requirements for di	, <u> </u>				(6-digit NFIP Community Identification Number)
U.S. Fish and Wildlife Service regarding this projects potential to jeopardize any ecologically sensitive coastal barrier resources. Any recommendations made by the Service were carried out. For projects in coastal communities: There was communication concerning this project with the state lead coastal zone management agency regarding the enforcement of the policies of the state's coastal zon management program in carrying out federally funded or federally authorized construction activities. An recommendations made by the agency were carried out. In addition to the above, for projects that also involved the development of a new site on which to place the relocated building(s), contituding in the appropriate boxes, below. Endangered Species Act: Consideration was given to the protection and preservation of threatened and/endangered species (including plants and animals and their habitat) whose existence may have been threatened by the construction activities. Communication took place with the U.S. Fish and Wildlife Servic (or the National Marine Fisheries Service if the project is in a coastal area) and the applicable state agencie for state-protected species and/or their habitat. Any recommendations made by the Services or stal agencies were carried out. Archaeological and Historic Preservation Act: The effects of the proposed relocation on archaeologic sites were considered. Point source and non-point source discharge (Clean Water Act, Section 402): Consideration was given to all permit requirements for municipal point source discharge (sewage treatment plant discharge) as well a non-point discharge (surface runoff) of a pollutant into surface waters. Communication with the Environmental Protection Agency or designated state office took place. Any recommendations made by the Corp. were carried out. Dredge and fill materials (Clean Water Act, Section 404): Consideration was given to all permit requirements for discharging dredge or fill material into waters of the United States, including wetlands			Certification Statemen	t for Acquisi	tion and Relocation Projects (cont.)
lead coastal zone management agency regarding the enforcement of the policies of the state's coastal zon management program in carrying out federally funded or federally authorized construction activities. An recommendations made by the agency were carried out. In addition to the above, for projects that also involved the development of a new site on which to place the relocated building(s), con nitialing in the appropriate boxes, below. Endangered Species Act: Consideration was given to the protection and preservation of threatened and/endangered species (including plants and animals and their habitat) whose existence may have bee threatened by the construction activities. Communication took place with the U.S. Fish and Wildlife Servic (or the National Marine Fisheries Service if the project is in a coastal area) and the applicable state agencies for state-protected species and/or their habitat. Any recommendations made by the Services or state agencies were carried out. Archaeological and Historic Preservation Act: The effects of the proposed relocation on archaeologic sites were considered. Point source and non-point source discharge (Clean Water Act, Section 402): Consideration was given to all permit requirements for municipal point source discharge (sewage treatment plant discharge) as well a non-point discharge (surface runoff) of a pollutant into surface waters. Communication with the Environmental Protection Agency or designated state office took place. Any recommendations made by the agencies were carried out. Dredge and fill materials (Clean Water Act, Section 404): Consideration was given to all permit requirements for discharging dredge or fill material into waters of the United States, including wetlands, an communication with the U.S. Army Corps of Engineers took place. Any recommendations made by the Corp. were carried out. Farmland Protection Policy Act: Consideration was given to the protection of prime and unique farmlance in the construction of this project.
